Please mute your mic if you are not speaking.

AGENDA

1. Welcome and Introduction from Co-Chairs (10 Minutes)
2. Research Collection Discussion (20 Minutes)
3. Presentations

What data can we use for our analysis of cost and performance of building systems? What are implications from this research for statewide buildings strategy?

- a. Cost and Other Implications of Electrification Policies on Residential Construction by the Maryland Association of Home Builders and Home Innovation Research Labs (15 minutes)
 - b. The Economics of Electrifying Buildings by the Rocky Mountain Institute (15 minutes)
 - c. Net-Zero Potential through Wastewater Thermal Energy: DC Case Study, presentation by DC Water (15 minutes)
4. Research Highlights from Participants (35 minutes)

All participants are welcome to highlight materials they've submitted for the group.

5. Conclusion and Next Steps (10 Minutes)
